Professional Learning

Artificial Intelligence (AI) is rapidly becoming part of everyday school life, influencing how teaching, learning, leadership and operations are shaped. While AI offers genuine opportunities to reduce workload, improve efficiency and enhance learning experiences, it also raises important questions about quality, safety, ethics and professional judgement. This series of events has been designed to support educators and school leaders to move beyond curiosity toward confident, responsible and practical engagement with AI—grounded in real school contexts and focused on impact, integrity and informed decision-making.

2026 ISQ AI Events

The Adventures in AI series is a collection of short, one-hour webinars designed to support educators in exploring practical AI tools and ideas that can be embedded into teaching and learning. Semester 1 offers two engaging webinars per term, supporting steady learning and confidence-building across the semester, with a new set of Adventures in AI sessions and topics launching in Semester 2.
